EDUCATION

Bina Nusantara University (BINUS) Jakarta, Indonesia
Bachelor of Computer Science in Database Technology (Mahasiswa Aktif / Active Undergraduate) *Expected 2028*
Cumulative GPA: 3.72 / 4.00
Relevant Coursework: Database Systems (SQL, MySQL, PostgreSQL, Relational Design & Normalization), Data Warehousing & ETL (Pentaho), Object-Oriented Programming (Java), Data Visualization (Tableau), Git Version Control, Virtualization Basics.

Sekolah Kemurnian II Jakarta, Indonesia
High School Diploma (Science / MIPA Track) *Graduated 2024*

TECHNICAL SKILLS

Data Warehousing & ETL: Data Warehousing, Pentaho Data Integration (Spoon), End-to-End Data Pipelines, Star-Schema Modeling, Fact & Dimension Tables, Data Normalization.

Databases & Systems: SQL (MySQL, PostgreSQL / Supabase), Relational Database Design, Schema Normalization (1NF–3NF), Data Integrity, Virtualization Basics.

Data Visualization & BI: Tableau Desktop, Executive Dashboard Design, KPI Formulation, Exploratory Data Analysis (EDA), Advanced Excel.

Programming & Tools: Java (Object-Oriented Programming), Python (Pandas, NumPy, Seaborn), Git & GitHub, RESTful APIs, C, Linux CLI Awareness.

PROJECTS & RESEARCH

Enterprise Data Warehousing & Comparative ETL Pipelines | Pentaho & Python 2026
- Built and managed data pipelines for enterprise data warehousing (**membangun dan mengelola data pipeline untuk data warehousing**), transforming multi-source macroeconomic datasets (**184–212 countries**) into structured **Star-Schema Fact and Dimension tables**.
- Constructed visual ETL pipelines in **Pentaho Data Integration (Spoon)** using Row Normalizer, Filter Rows, and Merge Joins, integrated with Python scripts managed under **Git** version control.
- Co-authored IEEE-format research evaluating execution latency, schema auditability, and pipeline reproducibility comparing visual low-code workflows against script-based Python architectures.

Portfolio Credit Risk & Delinquency Intelligence | Tableau Desktop 2026
- Analyzed enterprise credit dataset comprising **2.26 million loan accounts ($34.01 Billion funded volume)** spanning 2008–2018 to evaluate credit risk distribution and portfolio default rates.
- Architected interactive executive **Data Visualization** dashboards in Tableau tracking default rate (NPL) escalation from **Grade A (5.04%) to Grade G (41.40%)**, validating interest rate risk premiums.
- Formulated Debt-to-Income (DTI) underwriting risk matrices and state delinquency maps to pinpoint high-risk borrower profiles and recommend stricter verification policies.

GrowMass — Production Chain & Relational Cloud Database | PostgreSQL, SQL & Netlify 2026
- Architected a cloud relational database in **PostgreSQL (Supabase)** comprising **6 normalized tables** (`items`, `user_projects`, `user_inventories`, `shared_plans`, `profiles`) secured with **Row-Level Security (RLS)**.
- Synchronized **827 game items** and multi-tier crafting dependencies via **RESTful APIs**; managed under **Git / GitHub** and deployed live on **Netlify** (growmass-planner.netlify.app) with personal inventory stock deduction.

Global Bike Retail Seasonal Demand & Revenue Optimization | Tableau Desktop 2025
- Cleaned and transformed **113,000+ retail transaction records** into an executive **Data Visualization** dashboard driving inventory planning and demand forecasting.
- Designed interactive Tableau reporting dashboards uncovering seasonal peaks (**$85.27M revenue, $32.22M gross profit**), formulating data-backed inventory restocking strategies to mitigate stockouts.

EXPERIENCE & LEADERSHIP

Nasi Tim Mimi Jakarta, Indonesia
Digital Merchant Onboarding & Operations *2019 – Present*
- Spearheaded digital transformation for family business by registering, onboarding, and configuring store operations across online food delivery platforms (**GoFood, GrabFood, ShopeeFood**).
- Managed online catalog listings, promotional pricing strategies, and high-volume order fulfillment during peak operating hours, expanding digital customer reach.
- Delivered direct frontline customer service and managed daily order packaging, improving delivery handoff speed and order accuracy.

EVOKE Olympus Event Committee Jakarta, Indonesia
Logistics & Equipment Division (Perkap) *2023*
- Coordinated end-to-end stage equipment procurement, inventory tracking, and field layout setups under strict event production schedules.
- Collaborated with 5+ cross-functional committee divisions to rapidly resolve unexpected on-site logistical hurdles, ensuring seamless multi-day event execution.
